Live in Vinnitsa. Willing to relocate

Objective: Obtain a position java developer

Summary:

I study programming for 2 years. Graduated from Vinnitsa IT Academy, where I studied programing, including C++, HTML, PHP, java-script. Last year working and graduated java online courses "Juja". Now I self-learning java at home. To improve knowledge independently develop small projects. Learn English. Interesting in learning and professional development as a java developer.

Skils:

- Java SE (Core, OOP, Exceptions, Collections)
- Java EE (Servlets/JSP)
- Spring Framework (Spring MVC, Spring JDBC template, Spring Security)
- ORM (Hibernate)
- Databases (PostgresQL, SQLite, MongoDB)
- Swing
- Junit
- HTML, CSS, JavaScript
- Maven
- IDE: Intellij IDEA, Eclipse

Some self wrote the following projects:

SQL CMD - console application to work with PostgreSQL database. Using java core implemented CRUD features. https://github.com/rozborsky/sql

landing page - 3-paged landing page. Implemented registration and image upload to the server. https://github.com/rozborsky/landingPage

equation - page on which can calculate value of the quadratic equation and record the results in a database https://github.com/rozborsky/equation

calculationPi- desktop application for calculation π. With limited memory get OutOfMemoryError, catch it and take calculated value https://github.com/rozborsky/calculationPi

rss reader - desktop application for reading news. https://github.com/rozborsky/rssReader

toll road - The system of payment for the use of toll roads. Includes a desktop client and server. System installed on the toll road checkpoint. Implements Passes and calculates the fee for use, depending on the traversed path https://github.com/rozborsky/tollRoadClient.git
